To help you create the best composition of an image for editorial purposes, we include some tips about your camera's settings in Chapter 2. Keep in mind that the settings for your camera will generally differ from those of a DSLR camera. For the most part, all cameras come with good built-in features that you can use to create images, including features for controlling white balance, shutter speed, and ISO. Choosing and Customizing a Theme for Your Poster After you have taken a few shots using your camera, you are ready to composite a final image. Although many people use ready-made backgrounds, stock images, or templates, you can also create your own custom image to use as a background for your poster. In this section, we discuss how to use Photoshop to customize a background to match your poster's theme. Follow these steps to create a color and light theme for your poster: 1. Choose File=Open and open the image files you want to use. If you have multiple images open, you may want to open one image at a time. 2. Click the Background layer in the Layers panel (it's the last layer on top). 3. In the Layers panel, click the Adjustments panel menu and choose Color Variations. The Color Variations panel opens, as shown in Figure 12-5. You can use this panel to create a custom color variation. **Figure 12-5:** Use the Color Variations panel to create a custom color variation for your poster's background. 4. (Optional) Use the slider to adjust the midpoint of your color selection. If you have a particular color that you want to use, you may prefer to tweak the colors to achieve the perfect balance between the light and dark colors in your image. You can achieve this by using the slider to adjust the midpoint between the two color selections. 5. Click OK. Photoshop creates a custom color variation, and your background has its own color. However, some stock photo backgrounds may be too light and therefore can't match your poster's theme. 6. Open one or more photos for different regions of your poster. If you have pictures from the front and the back of your poster, you can use both. 7. Click the Background layer in the Layers panel. 8. Use the Move Tool to position your image{

Q: mongoose findByIdAndUpdate with actual field So I am trying to update fields in my data base. I am using mongoose and node.js. I have `{ exercise: title }` and an actual title called `{ title }` I want to find my object and update it using title property. My problem is that mongoose won't find the value. Here is my code: `exercise.findByIdAndUpdate({ title: "sdfsdf" }, { title: "asdasd" }, function(err, doc) { It should update doc with { title: "asdasd" } but it doesn't. A: The third argument is the update document you want to update. So in your case you need to pass this argument: exercise.findByIdAndUpdate({ title: "sdfsdf" }, { title: "asdasd" }, { title: "asdasd" }) Overlooked Property - The Twilight Mansion If you're a fan of The Twilight Saga, you may want to check out this property, located in the mountain town of Creswell. Many people know that the mansion features in the book's series, but it goes by the name of Helena's House. The mansion is owned by Carlos and Alex who received the house after their parents died. The house has become quite extravagant, with it having gorgeous antique furniture, paintings and even a waterfall in the garden. As you enter the house, you'll be greeted by a massive bed that's 7ft wide and hung with velvet curtains. Sitting in the bedroom, you'll find a stuffed bear with a soft toy head, a carriage and what seems to be a tailor's kit. As you head through the grand hallway you'll find the living room, which has antique furniture including a piano. You'll also find a dining room and library on the ground floor. The first floor of the house has been designated as a guest house, which contains a large bedroom, living room and bathroom. There's even an extra freezer to keep food cold. The owner doesn't like to cook and has given up on the house's original purpose. But the most interesting room is upstairs. Here you'll`

1. Field of the Invention The present invention relates generally to a bladed fan having a pair of outwardly projecting blades, and more particularly to an improved blade having a blade body and a blade tip secured at the outer ends of the blade body. 2. Description of the Prior Art Bladed fans of the above-described type have been used widely in the past. The blades of such fans are normally fixed at opposite ends of a rotatable shaft to form an air flow path therebetween. One particular bladed fan of this type is illustrated in the commonly assigned U.S. Pat. No. 3,908,571, granted Sept. 30, 1975, and reissued as U.S. Pat. No. 3,973,844 on July 10, 1976, the disclosure of which is incorporated herein by reference thereto. The fan shown in this patent includes two blades which are held in endwise engagement with the end edges of the blade body by assembly with cammed grooves and bolt-type of screws. The use of bolt-type of fasteners or screws as illustrated in the U.S. Pat. No. 3,908,571 to hold the blades in endwise engagement with the blade body is not desirable due to the time and trouble and relatively high cost of such fasteners or screws. Another bladed fan which is known from the prior art is shown in German Published Unexamined Application (DOS) 1,860,091. The bladed fan illustrated in this German Application has substantially H-shaped blade tips which are installed in grooves formed in the blade body and secured thereto by riveting. The grooves are defined by an inwardly extending edge and a pair of notched portions extending outwardly from the inwardly extending edge. A disadvantage of this fan is that the rivets have relatively sharp corners which tend to pierce the fabric of the material of the blade body, or my ticket to get there, and when you get out, you can't get in. Take a bus, but it may make sense to drive, and then take the train there in the morning. I do believe that it's important to have different ways of reaching different places...but I would rather not commute on public transport and this has added some cost. What about income taxes? Well, it's one of the things I'm really worried about. I do feel that for any artist to be
